

Approved For Release 2001/02/12 : CIA-RDP07B005703A000700060004-9

John [redacted] brought this in late Friday afternoon. [redacted] has the other copy. I believe you will want to study this and discuss it in some detail prior to your meeting with [redacted] on Tuesday morning.

I scanned through it and find no surprises. I don't feel qualified to comment on the technical proposals. I have looked at it from the "where does NPIC fit in" point of view. There is no direct reference to NPIC in the report. Two pertinent references, however, that give a clue ~~to~~ the ~~content~~ are on page 17 (which describe the Processing Facility Design), and on page 21 (which describe the Processing Facility Operation and

that the proposal to be
Management). I believe it can be inferred from
Approved For Release 2004/02/12 : CIA-RDP78B05703A000700060004-9
this writeup ~~is~~ is for NPIC and IAS PIs detailed

to the Processing Facility to deal with the PI
part of the process. It also appears that the
DDS&T seeks to maintain complete control over the
entire operation including the PI. I imagine that
[] will be seeking your reaction.

Now I imagine that [] will be very interested
in this proposal because this certainly has ~~some~~
implications that far exceed NPIC. It is hard to
see how OSP is going to resolve these political
problems and I can understand their desire to design a
closed-looped system.

Perhaps you would like to meet with []
[] later this afternoon on this.
